LOOKING FOR Cats 12 years and older

FCD/Biomarkers

The Study

The goal of our research is to understand the brain and cognitive changes that occur in our ever-growing geriatric and aging cat population.

Who Qualifies

Any cat 12 years and older that does not also have cancer.

What Happens

If you agree to have your cat participate in this study, you will get the following for FREE:

- Neurologic exam
- Ophthalmic exam
- Blood pressure
- Urinalysis
- CBC, Chemistry, T4
- Biomarker

We will need you to fill out a questionnaire about your cat's behavior.

Why Participate

By studying these changes, we are hoping to optimize diagnostic and treatment options available for cats with signs consistent with feline cognitive dysfunction.

There is NO COST to participate in this study.

More Information

For more information regarding this study, please contact Amy Elbe, CVT, LAT, at clinicalstudies@vetmed.wisc.edu.
